National Geographic: Human Footprint

all ages

Have you ever thought about how much food, everyday products, and fuel you've consumed during the course of your life? In National Geographic's new program you'll find out that it's a lot. From our cars to our dryers to our disposable toothbrushes, our impact on planet Earth is astonishing. (90 minutes)

Renovation Nation: Gardening - Watch Your Green Grow

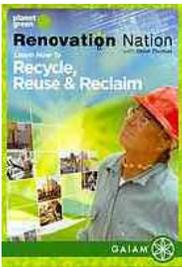

all ages

Learn how to get the biggest environmental impact from your own backyard. Join Steve Thomas, former host of "This Old House," as he travels the nation visiting eco-sensitive homeowners and plant experts to see how they're including the planet in their growing plans. Steve also explains how planting smart can reduce runoff, boost the ecosystem, clean and filter water, and provide a healthy, organic food source with less maintenance and long-term expense. (60 minutes)

Renovation Nation - Learn How to Recycle, Reuse and Reclaim

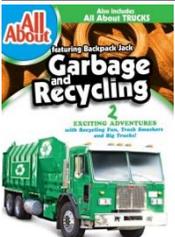

all ages

[Planet Green Renovation National Series]
From salvaged building materials to complete product repurposing, see how reclaiming and reusing can give your home a new look while holding onto part of the past. Tour facilities where manufacturers are creating the next generation of green home products and how these leading edge innovations have the power to transform our existing homes into efficient dwellings. (60 minutes)

All About: Garbage & Recycling

PreK-3

This fun and educational series teaches children about the world around them, from the ins and outs of garbage and recycling to everything they ever wanted to know about trucks. (60 minutes)

Ferngully - The Last Rainforest

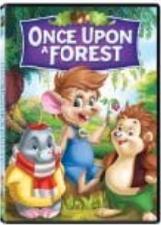

PreK-3

Magic and adventure await in FernGully where a tree fairy named Crysta gathers her friends together to save their world from the evil Hexxus. (72 minutes)

Once Upon a Forest

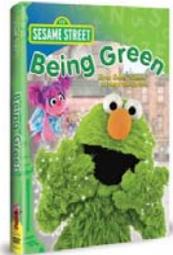

PreK-3

The animated story of three animals who set out to save their home and the life of a fellow creature endangered by a chemical spill in the forest. (71 minutes)

Sesame Street: Being Green

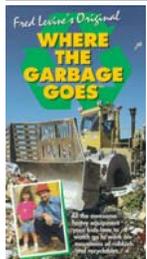

PreK-3

Elmo and Abby find out it can be easy being green when they stumble onto The Earth-a-Thon, hosted by Mr. Earth (Paul Rudd), happening right on Sesame Street. Telly, Rosita, and Cookie Monster answer phone calls from children calling in with pledges to reduce, reuse, recycle (and possibly send cookies to Cookie). But what happens when Abby uses her magic to help Elmo be really "green"? This jam-packed DVD is filled with songs, ideas, and suggestions from real kids around the world! (48 minutes)

Where the Garbage Goes

PreK-3

Jump into the driver's seat of all the haulers, grinders, dozers, loaders, and compactors that handle our waste. (30 minutes)

Bill Nye the Science Guy:

The Way Cool Game of Science

1-7

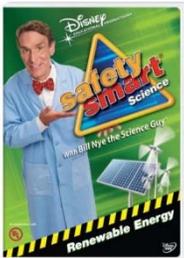

Two teams play a fun, fast paced interactive DVD game that tests their science knowledge about Earth History, Resources & Environment topics covered in the Bill Nye series.

Safety Smart® Science with Bill Nye the Science Guy:

2-8

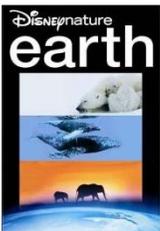

Renewable Energy

Bill Nye the Science Guy explores the science of renewable energy and demonstrates how we can use science and technology to engineer a brighter tomorrow. Using his trademark blend of hands-on demos and humor, Bill explains Newton's First Law. Then, he's off to the Renewable Energy Lab at UL to compare renewable and non-renewable energy sources such as fossil fuels, solar, wind, and hydroelectricity. (21 minutes)

Disneynature: Earth

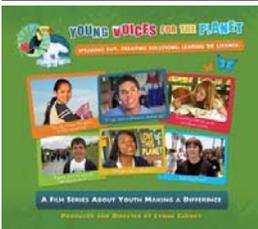

3-9

This DVD provides an opportunity of a lifetime to witness the astonishing creatures with which we share our planet. (25 minutes)

Young Voices for the Planet

5-9

Film series about youth making a difference. Author Lynne Cherry Showcases the remarkable accomplishments of youth in a series of nine short films. Using science, data, and conviction, these individuals have helped shrink carbon footprints and waste. (nine short films 4-6 minutes)

Global Warming: The Signs and the Science

6-8

This documentary profiles people who are living with the grave consequences of a changing climate, as well as the individuals, communities and scientists inventing new approaches to safeguard our children's future. Filmed across the U.S., Asia and South America, this program brings the reality of climate change to life and offers viewers a variety of ways to make difference in their own communities. (60 minutes)

The Clean Bin Project

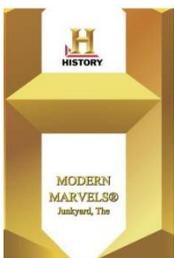

6-12

What would it take to live waste free? What would be the impact on the planet, and on our lives? The Clean Bin Project follows a couple, Jen and Grant, as they go head-to-head in an uplifting and often-humorous competition to see who can produce the least amount of garbage in an entire year. (50 minutes)

History -- Modern Marvels: The Junkyard

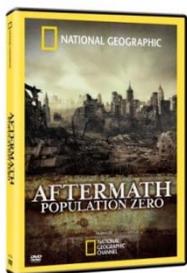

6-12

One man's trash is another man's treasure. It is the place where machines come to die. But for some, it is also a treasure trove of possibilities – it is the junkyard! See how reuse and recycling not only give old parts new life, but how it can be profitable as well. (50 minutes)

National Geographic: Aftermath: Population Zero

6-12

What would happen if every single person on Earth disappeared? A world without people, where city streets would still be populated by cars, but without drivers. Nobody to fix bridges, repair buildings, or maintain power plants. How long would skyscrapers, nuclear power plants and our homes last if abandoned? This DVD gives us a chance to see the effect of human beings by seeing how Earth would adapt without us, and how long it would take to regenerate the damage we have caused. (90 minutes)

No Impact Man

6-12

Author Colin Beavan leaves behind his liberal complacency and vows to make as little environmental impact as possible for one year. No more automated transportation, no more electricity, no more non-local food, no more material consumption...no problem. Or is it? (93 minutes)

Bag It!

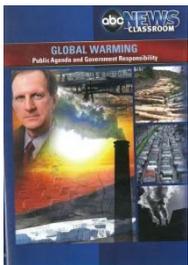

7-12

Try going a day without plastic. In this touching and often flat-out-funny film, we follow "everyman" Jeb Berrier as he embarks on a global tout to unravel the complexities of our plastic world. What starts as a film about plastic bags evolves into a wholesale investigation into plastic and its effect on our waterways, oceans and even our own bodies. We see how our crazy-for-plastic world has finally caught up to us and what we can do about it. (78 minutes)

Global Warming: Public Agenda and Government Responsibility

7-12

This DVD features stories from Good Morning America, 20/20, This Week, World News Tonight and Nightline that examine the growing climate crisis from many points of view.

Sew Green: Repurpose, Recycle and Restyle

7-12

One way to go green is to sew green. Using unconventional fabrics like sleeves from wool sweaters and "fabric" made from fused plastic bags, learn the basics of sewing through simple and easy to make projects that incorporate recycling. Four unique sewing project are demonstrated, including:

- A fused plastic messenger-style bag
- A cell phone or mp3 player holder
- A protective sleeve for a laptop
- A water bottle holder

(4 segments, approximately 38 minutes)

Dirt! The Movie

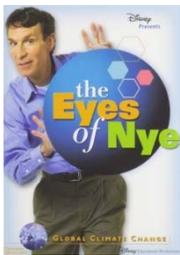

9-12

Inspired by *Dirt: The Ecstatic Skin of the Earth* by William Bryant Logan, the movie takes a humorous and substantial look into the history and current state of the living organic matter that we come from and later return to. It is an insightful and timely film that tells the story of the glorious and unappreciated material beneath our feet. (80 minutes)

The Eyes of Nye: Global Climate Change

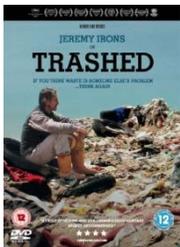

9-12

Find out how scientists measure climate change, see how carbon dioxide affects the temperature of Earth's atmosphere, and hear about the role of fossil fuels. (23 minutes)

Trashed

9-12

The film analyzes the causes and effects of the seemingly innocuous act of "taking out the garbage" while showcasing the individuals, activists, corporate and advocacy groups working to affect change and reform the current model. (77 minutes)
